

Exercise

Predict the output before running:

```
a = [[10, 20], [30, 40]]
```

```
b = a.copy()
```

```
b[0].append(50)
```

```
print(a)
```

```
print(b)
```

Then predict:

```
a = [[10, 20], [30, 40]]
```

```
b = a.copy()
```

```
b.append([50, 60])
```

```
print(a)
```

```
print(b)
```
